

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE  
Transcriber's Office  
FLOOR DEBATE

March 7, 2001

LB 574

continue. Mr. President, I'm not much on this high tech such as Senator Landis is capable of doing, but when it comes to low tech, like pushing on your butt...pushing your button to make a light turn on, I know how to do that, and I know how to do that quickly. But here is the question that I'm asking Senator Bromm. If we have this digitally generated image, why is that not sufficient for the purpose of identifying us for the...first of all, what would be the purposes DMV would have for needing to pull up that image?

SENATOR CUDABACK: Senator Bromm, do you yield?

SENATOR BROMM: Sure. I think it would be to verify the identity of someone who is applying for a duplicate license and also to provide the opportunity for someone to renew their license in four, five years without coming in for another photo. The bill provides they can go ten years without a new photo.

SENATOR CHAMBERS: Okay. So why is that digital image not sufficient to fulfill that purpose?

SENATOR BROMM: Because, believe it or not, there may be other people in the world who look like Ernie Chambers and who can pass himself off as Ernie Chambers, and if we have the ability to compare mathematically your facial features with your digital photo that's in our file we'll know if we're talking to Ernie Chambers to a great deal more certainty than simply by looking at you and looking at your photo.

SENATOR CHAMBERS: Senator Bromm...

SENATOR BROMM: And your pho...

SENATOR CHAMBERS: Oh.

SENATOR BROMM: ...your photo eight years ago might look different, I think, down on the board than it does today,...

SENATOR CHAMBERS: So then...

SENATOR BROMM: ...but your facial feature...I'm sorry, Ernie.
